EDUCATION

Bachelor of Technology in Computer Science and Engineering Nov 2021 – July 2025
Swami Vivekanand College of Engineering, Indore, India 7.67 CGPA

XII Standard 2021
Nirmal Vidhyapeeth Barwaha. School 60%

X Standard 2019
Nirmal Vidhyapeeth Barwaha School 60%

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript, Dart

Frontend Tech: HTML, CSS, React.Js, Flutter

Developer Tools / Version Control: VS Code, Git, Github, FlutterFlow, Supabase, Firebase

Course Fundamentals: Data Structure and Algorithm, OOPS

EXPERIENCE

Software Developer — Narma Devs June 2025 – Present

Swell Breaks App  Live App
FlutterFlow, Supabase

- Designed and developed a mobile application using FlutterFlow, focusing on rapid development and responsive UI.
- Implemented interactive layouts and customized components to deliver a seamless user experience across devices.
- Integrated Supabase for secure user authentication and utilized its APIs for efficient data storage and management.

WhatFBO App  Play Store
FlutterFlow, OpenAI, Supabase

- Built and published a mobile application to the Google Play Store using FlutterFlow for cross-platform deployment.
- Integrated OpenAI API to power an intelligent in-app chat feature, enabling interactive AI-driven conversations.
- Utilized Supabase for robust backend data management and secure user authentication across the app.

Gotogether App
FlutterFlow, Supabase, Firebase, Paystack

- Developed a comprehensive carpooling application featuring distinct user roles for drivers and passengers to seamlessly post and find rides.
- Integrated Paystack payment gateway to facilitate secure and seamless in-app transactions for ride bookings.
- Implemented real-time in-app notifications using Firebase to enhance user communication and engagement.
- Built a dedicated administrative panel to monitor application activity, manage users, and oversee ride operations.
- Utilized Supabase for robust backend data management and secure user authentication.

PROJECTS

Gemini AI Chatbot Clone  GitHub
HTML, CSS, JavaScript, React.Js

- Developed interactive, dynamic, and reusable components using React.js to build modern web applications.
- Utilized React hooks like useState and useEffect for efficient state management and to handle side effects during API interactions.
- Integrated with a conversational AI API to process user input and display real-time responses, mimicking human-like conversations.

CERTIFICATIONS

- Winner Of College Hackathon
- Data Structures and Algorithms using C++
